ELSEVIER

CONTENTS
VOLUME 50, 1999

Articles

Nucleus ambiguus and bulbospinal ventral respiratory group neurons in the neonatal rat.
Ellenberger, H. H. 1

Modulation of acetylcholine and 5-hydroxytryptamine release in hippocampal slices of rats with fimbria-fornix lesions and intrahippocampal grafts containing cholinergic and/or serotonergic neurons.
Suhr, R., E. Balse, A. Haaf, C. Kelche, J.-C. Cassel, and R. Jackisch 15

Intracellular and cell-surface distribution of amyloid precursor protein in cortical astrocytes.
Young, M. J., R. K. K. Lee, S. Jhaveri, and R. J. Wurtman 27

Defeat is a major stressor in males while social instability is stressful mainly in females: Towards the development of a social stress model in female rats.
Haller, J., E. Fuchs, J. Halász, and G. B. Makara 33

Midbrain central gray is involved in mediation of cholinergic inputs to the rostral ventrolateral medulla of the rat.
Kubo, T., Y. Hagiwara, D. Sekiya, and R. Fukumori 41

Increase of vasopressin mRNA in the hypothalamus of inbred polydipsic mice.
Nishi, R., Y. Ueta, R. Serino, M. Nomura, Y. Yamamoto, I. Shibuya, K. Koizumi, and H. Yamashita 47

Effect of cholinergic drugs on the concentration of intracellular free calcium of rat pituitary intermediate lobe cells.
Némethy, Zs., G. B. Makara, and Zs. Ács 53

Low concentrations of ethanol deplete type-2 astrocytes of intracellular free magnesium.
Babu, A. N., T. P.-O. Cheng, A. Zhang, B. T. Altura, and B. M. Altura 59

Immunoelectron microscopic study of glutamate inputs from the retrosplenial granular cortex to identified thalamocortical projection neurons in the anterior thalamus of the rat.
Wang, B., A. Gonzalo-Ruiz, L. Morte, G. Campbell, and A. R. Lieberman 63

Review Articles

Hypothesized neural dynamics of working memory: Several chunks might be marked simultaneously by harmonic frequencies within an octave band of brain waves.
Glassman, R. B. 77

The early history of the synapse: From Plato to Sherrington.
Bennett, M. R. 95

Articles

Electrophysiological effects of opioid receptor activation on Syrian hamster suprachiasmatic nucleus neurones *in vitro*.
Cutler, D. J., M. K. Mundey, and R. Mason 119

Beneficial effect of renin-angiotensin system for maintaining blood pressure control following subarachnoid haemorrhage.
Fassot, C., G. Lambert, E. Gaudet-Lambert, P. Friberg, and J.-L. Elghozi 127

Methionine residue 35 is important in amyloid β-peptide-associated free radical oxidative stress.
Varadarajan, S., S. Yatin, J. Kanski, F. Jahanshahi, and D. A. Butterfield 133

Induction of CD40 on human endothelial cells by Alzheimer's β-amyloid peptides.
Tan, J., T. Town, Z. Suo, Y. Wu, S. Song, A. Kundtz, J. Kroeger, J. Humphrey, F. Crawford, and M. Mullan 143

CONTENTS VOLUME 50 NUMBER 3 OCTOBER 1999

Review Article

How did the human brain evolve? A proposal based on new evidence from *in vivo* brain imaging during attention and ideation.
Rapoport, S. I. 149

Articles

D-Amphetamine-induced depletion of energy and dopamine in the rat striatum is attenuated by nicotinamide pretreatment.
Wan, F.-J., H.-C. Lin, B.-H. Kang, C.-J. Tseng, and C.-S. Tung 167

Role of the locus coeruleus on blood pressure response and atrial natriuretic peptide secretion following extracellular volume expansion.
Anselmo-Franci, J. A., M. J. A. Rocha, V. L. Peres-Polon, E. Resende Moreira, J. Antunes-Rodrigues, and C. Rodrigues Franci 173

The neuroprotective and hypothermic effect of GYKI-52466, a non-competitive α-amino-3-hydroxy-5-methyl-4-isoxazolepropionic acid-antagonist on histological and behavioural variables in the gerbil global ischemia model.
Gyertyán, I., G. Gigler, and A. Simó 179

Inhibitory effect of regucalcin on Ca^{2+}-dependent protein kinase activity in rat brain cytosol: Involvement of endogenous regucalcin.
Hamano, T., Y. Hanahisa, and M. Yamaguchi 187

Relationship between sexual behavior and sexually dimorphic structures in the anterior hypothalamus in control and prenatally stressed male rats.
Rhees, R. W., H. N. Al-Saleh, E. W. Kinghorn, D. E. Fleming, and E. D. Lephart .. 193

Ventrolateral periaqueductal gray matter and the control of tonic immobility.
Monassi, C. R., C. R. A. Leite-Panissi, and L. Menescal-de-Oliveira 201

Endogenous GABA potentiates the potassium-induced release of dopamine in striatum of the freely moving rat: A microdialysis study.
Galindo, A., A. Del Arco, and F. Mora 209

Leptin-induced increase in sympathetic nervous and cardiovascular tone is mediated by proopiomelanocortin (POMC) products.
Dunbar, J. C., and H. Lu 215

CONTENTS VOLUME 50 NUMBER 4 NOVEMBER 1, 1999

Articles

Nitric oxide production is decreased in the brain of the seizure susceptible EL mouse.
Uchida, M., I. Nagatomo, Y. Akasaki, M. Tominaga, W. Hashiguchi, S. Kuchiiwa, S. Nakagawa, and M. Takigawa 223

Selective alterations of glycosaminoglycans synthesis and proteoglycan expression in rat cortex and hippocampus in pilocarpine-induced epilepsy.
Naffah-Mazzacoratti, M. G., G. A. Argañaraz, M. A. Porcionatto, F. A. Scorza, D. Amado, R. Silva, M. I. Bellissimo, H. B. Nader, and E. A. Cavalheiro 229

Effects of testosterone on the synaptology of the medial preoptic nucleus of male Japanese quail.
Castagna, C., A. Obole, C. Viglietti-Panzica, J. Balthazart, and G. C. Panzica 241

Reduction in somatostatin and substance P levels and choline acetyltransferase activity in the cortex and hippocampus of the rat after chronic intracerebroventricular infusion of β-amyloid (1-40).
Nag, S., B. K. Yee, and F. Tang 251

Pyramidal neuron types in field CA2 of the guinea pig.
Bartesaghi, R., and L. Ravasi 263

Impact of a preceding striatal excitotoxic lesion and treatment with ciliary neurotrophic factor on striatal graft survival.
Petersén, Å., M. Emgård, and P. Brundin 275

Ontogeny of puromycin-sensitive and insensitive aminopeptidase activities in several subcellular fractions of the rat brain.
de Gandarias, J. M., J. Irazusta, J. Gil, D. Fernández, A. Varona, and L. Casis 283

Odor-induced fast waves in the dentate gyrus depend on a pathway through posterior cerebral cortex: Effects of limbic lesions and trimethyltin.
Heale, V. R., and C. H. Vanderwolf 291

CONTENTS VOLUME 50 NUMBERS 5/6 NOVEMBER 15/DECEMBER, 1999

Special Issue: Highlights of Twentieth Century Neuroscience

Editorial

"Highlights of Twentieth Century Neuroscience" *Brain Research Bulletin*, special last issue for 1999.
Dunnett, S. B. 301

Highlights

Lapicque's introduction of the integrate-and-fire model neuron (1907).
Abbott, L. F. 303

The view from inside.
Andersen, P. 305

Overton on the indispensability of sodium ions.
Huxley, A. F. 307

Sodium channels: From mechanisms to medicines?
Waxman, S. G., and J. N. Wood 309

Intracellular traffic in nerve cells.
Grafstein, B. 311

Recycling of synaptic vesicle membrane within nerve terminals.
Jahn, R. 313

Slow potentials in the brain: Still little understood but gradually getting analytical attention.
Bullock, T. H. 315

Retinal processing of visual information.
Dowling, J. E. 317

Bridging sensory signals in the monkey and percepts in the human mind.
Vallbo, Å. B. 319

Perception as probability.
Purves, D. 321

Descending control of forelimb movements in the cat.
Lundberg, A. 323

The significance of supraspinal control of reflex actions.
Burke, R. E. 325

On advances in studies of the properties of various types of neurones and their functional roles.
Jankowska, E. 327

Noise analysis at the neuromuscular junction.
O'Donovan, M. J. 329

The cerebellum, a gateway to modern neuroscience.
Ito, M. 331

Arrest of firing of aminergic neurones during REM sleep: Implications for dream theory.
Hobson, J. A. 333

Publication of *The Computer and The Brain*, by John von Neumann, 1958.
Wilson, C. J. 335

Probing consciousness with an electrode.
Hikosaka, O. 337

How does conscious experience arise? The neural time factor.
Libet, B. 339

Specificity and diversity of cerebral transport systems: What we learned from brain slice preparations.
Sershen, H. 341

Nerve cells in culture: The extraordinary discovery by Ross Granville Harrison.
Gähwiler, B. H. 343

Discovery of nonerythroid spectrin to the demonstration of its key role in synaptic transmission.
Goodman, S. R. 345

Otto Loewi and the demonstration of chemical neurotransmission.
Zigmond, M. J. 347

Dale's principle.
Strata, P., and R. Harvey 349

Extrasynaptic receptors and parasynaptic communication in the brain.
Herkenham, M. 351

Glutamate: An excitatory neurotransmitter in the mammalian CNS.
Weinberg, R. J. 353

Purinergic cotransmission.
Burnstock, G. 355

The discovery of endogenous cannabinoids.
Kunos, G. 359

Multiple direct actions of peptides on the CNS.
Kastin, A. J. 361

Birth of neuropsychopharmacology—impact on brain research.
Carlsson, A. 363

The autonomic nervous system and the histochemical fluorescence method for the microscopical localization of catecholamines and serotonin.
Dahlström, A., and K. Fuxe 365

The mapping of the central aminergic pathways.
Glowinski, J. 369

Neurobiology thanks to microbiology: The legacy of Albert H. Coons (1912–1978).
Hökfelt, T. 371

Mary Bernheim and the discovery of monoamine oxidase.
Slotkin, T. A. 373

The discovery of dopamine's physiological importance.
Roe, D. L. 375

The first miracle in neurodegenerative disease: The discovery of oral levodopa.
Kordower, J. H., and C. G. Goetz 377

The discovery of monoamine transporters and their role in CNS drug discovery.
Iversen, L. L. 379

Tyrosine hydroxylase from cloning to neuropsychiatric disorders.
Mallet, J. 381

The discovery of axonal transport.
Bentivoglio, M. 383

The intracellular HRP technique.
Moschovakis, A. K. 385

Visualization of the entire trajectory of long axons of single mammalian CNS neurons.
Shinoda, Y. 387

Integration of brain activities: The roles of the diffusely projecting brainstem systems and the corpus callosum.
Berlucchi, G. 389

Brainstem activation of thalamocortical systems.
Steriade, M. 391

The visual display of neuronal structure.
Guillery, R. W. 393

From Cajal's chemotaxis to the molecular biology of axon guidance.
Sotelo, C. 395

The neuroanatomy revolution of the 1970s and the hypothalamus.
Swanson, L. W. 397

The third quarter of the twentieth century; the golden age of the silver methods.
Heimer, L. 399

Tracing pathways in CNS regeneration research.
Lieberman, A. R. 401

Functional axonal regeneration following spinal cord injury.
McClellan, A. D. 403

Sokoloff's ^{14}C-deoxyglucose method.
Savaki, H. E. 405

The twentieth century belongs to neuropsychology.
Kolb, B. 409

The laboratory rat, the Pied Piper of twentieth century neuroscience.
Whishaw, I. Q. 411

Localizing cognitive operations.
Posner, M. I. 413

Circulation and metabolism of the human brain.
Kety, S. S. 415

***In vivo* biochemistry of the brain in understanding human cognition and emotions: Towards a molecular psychology.**
Pietrini, P., M. L. Furey, and M. Guazzelli 417

The discovery and rediscovery of the role of the corpus callosum.
Finger, S., and S. M. Kanne 419

The Poffenberger paradigm: A first, simple, behavioural tool to study interhemispheric transmission in humans.
Marzi, C. A. 421

Two brains, one person.
Doty, R. W. 423

The transformation of association cortex into sensory cortex.
Kaas, J. H. 425

Kao-Liang Chow and the visual functions of the temporal lobe.
Glickstein, M. 427

Ivan Divac and the neostriatum as a cognitive structure.
Dunnett, S. B. 429

Rate processing constraints may underlie developmental language impairments and also hemispheric specialization for speech.
Creese, I. 431

Ivan Petrovich Pavlov and the conditioned reflex.
Gray, J. 433

Neurophysiology of habituation and internal inhibition (discoveries made by Hernández-Peón in the 1950s).
Drucker-Colín, R. 435

D.O. Hebb: *The Organization of Behavior*, Wiley: New York; 1949.
Morris, R. G. M. 437

What invertebrate circuits have taught us about the brain.
Selverston, A. 439

cAMP and memory: A seminal lesson from *Drosophila* and *Aplysia*.
Silva, A. J., and G. G. Murphy 441

Holger Hyden and the biochemistry of memory.
Rose, S. P. R. 443

The perseveration-consolidation hypothesis: Mueller and Pilzecker, 1900.
McGaugh, J. L. 445

Mapping recognition memory in the primate brain: Why it's sometimes right to be wrong.
Aggleton, J. P. 447

MacCurdy and memories: The origins of implicit processing and covert awareness.
Cowey, A. 449

***The Physiology of Motivation* by Eliot Stellar.**
Winn, P. 451

Neurochemistry of thermoregulation: Two negatives make a positive.
Myers, R. D. 453

Angiotensin-induced drinking: A model of peptidergic control of behaviour.
Fitzsimons, J. T. 455

Towards a new descriptive psychopathology: A *sine qua non* for neurobiological research in psychiatry.
Berrios, G. E. 457

Leão's spreading depression of EEG activity.
Bures, J. 459

The discovery of the poliovirus.
Kristensson, K. 461

The pathological anatomy of the lesion in multiple sclerosis.
Compston, A. 463

α-Synuclein and Parkinson's disease.
Burke, R. E. 465

Glutamine repeats and neurodegenerative diseases.
Perutz, M. F. 467

Tau protein and the paired helical filament of Alzheimer's disease.
Goedert, M., and A. Klug 469

Mutations in the *Tau* gene cause frontotemporal dementia.
Ghetti, B., J. Murrell, and M. G. Spillantini 471

The unravelling of the code of nerve growth: A modern Saga of the dedication to science.
Ottoson, D. 473

Continuous high frequency stimulation of deep brain structures in brain pathology.
Agid, Y. 475

Transplanted precursors of nerve cells: Das and Altman and the revival of neural transplantation research.
Björklund, A. 477
